DEF. DOG. # 18234

Translated by Defense Language Brench

STATULAR OF THE DIRECTOR OF THE INFORMATION BURELU CONCLUDING THE POLITICA OF ALAREMS AND CLUTCH AS WELL AS THE LEFED IT. OR ON . CHILLS, FISHING BOAT (AT A FOREIGN FLESS CO FERENCE)

(September 29, 1937)

At Geneva, the bombing by Japanese air forces, especially the attack on Manking and Centen was condemned. The Edvisory Cormittee of the League of Mations approved a resolution to "Condemn solemnly" the Japanese air forces on the ground that they had attacked "open cities." However, there is absolutely no reason why Japan should be interested in the measures of the League of Mations. The Japanese, however, connet but resent most bitterly the attitude of such an organization as the League of Mations to condemn Japan irresponsibly without positive proof relying upon very partial and in-accurate newspaper reports.

In the first place, the grounds of the resolution of the Committee of the Leegue of Metions to insist that Manking and Conton are open cities are false views. It is a well known fact that these cities are defended with fortresses and other military installations. We cannot help but hope therefore, that in the name of fairness and its prestige, the League of Metions would take actions only on concrete proof.

It is very clear from the article appearing in the "South China Morning

STARBARY OF THE DIRECTOR OF THE INFORMATION BURELU COMO. THE THE FOLDING OF ALAKING AND CARTON AS WELL AS THE JULIOTO ATER ON A CHILLOT FISHING BOAT (AT A FORDIGH TILES OF FIRE CE)

(September 29, 1937)

At Geneva, the bombing by Japanese eir forces, especially the attack on Nanking and Centen was condemned. The Advisory Cormittee of the League of Nations approved a resolution to "Condemn solemnly" the Japanese air forces on the ground that they had attacked "open cities." However, there is absolutely no reason why Japan should be interested in the measures of the League of Nations. The Japanese, however, connet but resent most bitterly the attitude of such an organization as the League of Nations to condemn Japan irresponsibly without positive proof relying upon very partial and in-accurate newspaper reports.

In the first place, the grounds of the resolution of the Committee of the League of Metions to insist that Manking and Conton are open cities are false views. It is a well known fact that these cities are defended with fortresses and other military installations. We cannot help but hope therefore, that in the name of fairness and its prestige, the League of Metions would take actions only an concrete proof.

It is very clear from the exticle appearing in the "South Chine Morning

DEF. DOC. #1284

reported with regard to the activities of our air forces. That is to say, on the 24th of September, the Pouter dispetch from Centen reported that as a result of the attack of Japanese air forces, several thousands innecent prople of Centen were either killed or wounded, but the South Chine Forting Post pointed out that the above news were grossly exaggerated. According to the reporter of the Post who visited the Centen authorities in person and asked foreign residents there of the fact, the assulities of Centen people were no wore than 100. Furthermore, although air raid alarm was saunded throughout Saturday and Sunday at Centen, no bomb was dropped in the city by the Japanese air force. The Japanese Government have issued statements on several accessions that the air raid by the Japanese Army and Nevy is a part of military operations that Japan has been compelled to take in order to cope with the challenge on the part of China, and that the objectives of our air forces are nover non-combatants but the Chinese army and their installations.

This is confirmed by the incident of Conton above referred to as well as later operations adopted by the Japanese force.

Furthermore, it is hardly necessary to recell that, with regard to a general problem of air raid, Japan maintained together with America in the Hagua Conference in 1922 that the objectives of air raid be limited, but our contention was defected by the opposition of Pritain and France.

Now that things have come to such a pass, it is important that our frmy and Navy should destroy enemy's fighting power by taking every and all apportunities, and they are now courageously fulfilling this duty. From the

beginning of the curren incident, the Jepenese cir forces are strictly ordered to limit their objectives only to troops and military installations. Unlike the Chinese air force which attacked the "President Hoover," our air forces never attacked non-combatants purposely, nor did they ever drop bombs indiscriminately from a high altitude. Owing to targets being limited only to military objectives, the Japanese air force when bombing, had to dive, in spite of the danger of the Chinese defensive fire, and thereby sustained greater scarifice; and there have been not a few cases, in which Japanese airplanes after taking off from their base had to come back with all the bombs they had taken because they could not find out their objective due to bad weather. Those facts prove very clearly that the bombing by the Japanese air force was limited only to the Chinese Army and their installations.

In spite of the fact that the Canton-Hankow Reilway transported a large number of Chinese troops and munitions to the north front for several days and nights, and the consequent sacrifice of our troops was naturally expected, nevertheless, it was not until the transportation of Chinese refugees was completed safely that the destruction of reilroads and bombing of freight-cars transporting munitions were carried out by our air forces.

It is a great regret that under the present state of air fighting, the air unit, no matter how superior they are in the art of bombing, cannot be expected to have absolute accuracy in its bombing. Such being the case and in order to prevent injury to life, the Japanese air headquarters, when carrying out a bombing attack, sent a warning, as early as possible prior to

it, to the responsible authorities concerned for the sefety of non-combitants, so that they may be enabled to take all necessary steps against our attack.

This, of course, caused much strategic difficulties on our part, which, however, we were willing to forbear.

t t () ()

Under the present circumstances, Japan is propored to take decisively every necessary step to destroy enemy's fighting power. It must, however, be noted that this measure is a result of the expension of the incident which has been brought about inevitably by the challenge on the part of China. It was indeed the Chinese air force that attacked Shanghai on the bloody August 14th and dropped bembs on the International Settlement, the Japanese consulate-General and the Japanese warships. And, in defiance of our draft peace settlement and also in spite of efforts being made to avoid hestilities, China sent a large number of troops to the border of the Settlement and violated her solemn pledge.

Japan declares again in this connection that no nation has any right to attack non-combatants. With this principle in mind, Japan goes straight forward to attain her objectives, and is not shy of the responsibility due to her, but she firmly rejects partial and unfair blame.

The Chinese are very active of late in disseminating false propagands over radio accusing the Japanese army of mass-slaughter of non-combatants and of distroying hospitals and schools, etc. Madame Chiang Kai-shek is also playing an important role of "propagandists" behind the scene. The fact that Chine came to employ such a method in propaganda means

DUF. DOC. #1284

nothing but the loss of her emtition of resistence excinst Japan on recount of our military operations especially our bombins on her military installations and the blockeds of her coast line navigation by Japan.

The absurd propagends of Chine, however, has brought about an effect which is contrary to her expectation. Foreign correspondents in Shanghai are very much complaining of the inaccuracy of information supplied them by Chinese spokesmen. Even Chinese spokesmen. Even Chinese spokesmen. Even Chinese for four of losing public confidence in Chine through spreading false reports, ordered a few days ago proper control over disseminating unfounded information.

Chinese propagands seems to be centered on operations of our air forces. They have broadcast that our airplanes abused the Chinese insignia or that two Japanese planes were brought down; however, this was nothing but a Chinese way of propagands intended to cover the crash of Chinese planes. The Imperial Japanese army which is openly raising a punitive expedition, against the injustice and impropriety on the part of China can hardly think of surreptitionally using enemy's emblem or insignia, aspecially the Japanese soldier would rether die then to commit disgreceful conducts. The manners in which information was conceeded by the Chinese was perfectly exhibited when an air raid on the Cathey Hotel, Shanghai, took place on Jugust 14.

The Chinese newspaper consors changed the word "Chinese planes" in the coblogram into "Japanese planes." To their surprise, however, owing to the context of the Called Table in turned out to mean ridiculously that Japanese planes benead the H.I.J.M.S. "Izumo."

Due to such interference on the part of Chine with newspaper cobles, foreign correst udents came to mail their dispatches, to Hongkong to coble them therefrom. There was all the difference in the world between such callegrams and those despetched from Shanghei.

Inother good example was the false report-that a Japanese submarine torpodoed a Chinese junk and caused a casuality of 300 people. However, the Japanese submarines have been strictly ordered not to attack junks. So that such an attack on a junk can neither be real nor be possible to imagine. Furthermore, there was no Japanese submarine cruising in the waters where the alleged sinking of the said junk was reported. I do not hesitate to declare positively that this information was absolutely nothing but a fabricated report.

## CERTIFICATE OF .. UTHENTICITY

I, who occupy the post of the Chief of the Archives and Documents Section of the Foreign Office, hereby certify that the document hereto attached, written in Japanese, consisting of 6 pages and entitled "Statement of the Director of the Information Bursau concerning the bembing of Nanking and Canton as well as the alleged attack on Chinese fishing-boats (at a foreign press conference) (September 29th. 1017.)", is an exact and true copy of the official document in the custody of the Foreign Office.

certified at Tobyo, on this <u>8th</u> day of <u>April</u>, 1947

(signed) HAYASHI, Maoru (seal)

I hereby certify that the above signature and seal were affixed hereto in the presence of the Witness.
